## Summary

---

I am a passionate and driven developer looking for my first job, where I can expand my skills and acquire new ones, both on frontend and backend site. Programming has always been my personal interest and passion, and my motivation comes from the opportunity of learning new skills. I can quickly and easily pick up new knowledge as required, meanwhile enjoying the learning process.

I always deliver my work on time, and I ensure what I finish will meet the required standards. I am open to challenges and opportunities of stepping out of my comfort zone in order to learn and improve my abilities.

Please visit my portfolio and my GitHub profile for sample projects. I am currently based in London, but willing to relocate as needed, I am highly flexible in that aspect.

## Soft Skills

---

- Quality-focused
- Time management
- Self-learner
- Team player
- Flexible
- Problem solver
- Strong communication skills

## Technical skills

---

**Frontend technologies:** *HTML5, CSS, JavaScript, Typescript, ReactJS*
